JUNE 2026

MONTHLY INDUSTRY BRIEFING

FROM THE DESK OF WENMAR

Welcome to the June briefing. This month we spotlight our referral partnership with SkyEagle Aviation Academy — a direct line for our clients into two of the most career-defining programs in U.S. flight training — alongside the latest from across the industry. As always, Wenmar is your single point of contact for FAA representation and the pathways that move aviation careers forward.

PARTNER SPOTLIGHT

SKYEAGLE AVIATION ACADEMY

Professional Pilot Program & ATP-CTP

Through Wenmar's referral partnership with SkyEagle Aviation Academy (FAA Part 141, Fort Lauderdale), our clients gain a direct, supported line into two career-defining training pathways:

PROFESSIONAL PILOT PROGRAM

38 weeks, zero to CFI. A fixed-price, all-in pathway at \$89,900 that takes a new student from first flight to certified flight instructor — in structured monthly groups, with predictable cost end to end.

ATP-CTP

The Airline Transport Pilot Certification Training Program — required before the ATP written exam. SkyEagle delivers it in-class and virtually, on airline-class simulators, for pilots approaching the 1,500-hour ATP minimum.

WHY IT MATTERS: With airlines projecting strong 2026 hiring and industry training costs averaging \$75,000–\$100,000, a structured, fixed-price pathway protects the investment — and Wenmar clients are referred directly and supported throughout.

INDUSTRY NEWS — JUNE 2026

Carriers signal strong 2026 pilot hiring

American (~1,500), United (~2,500) and Delta (~600 in Q1) have all outlined robust 2026 hiring, and flight-school placement data shows clear momentum after a quieter 2025.

ATP-CTP pathways expand in Florida

A Vero Beach academy added an ATP-CTP and CFI pathway in May, delivered through Miami and Orlando simulator partners — underscoring how central the ATP-CTP step has become to the airline track.

Regulatory watch: MOSAIC keeps rolling out

The FAA's MOSAIC modernization expands sport-pilot privileges now, with broader light-sport aircraft certification standards set to follow on July 24, 2026 — potentially lowering the cost of entry to flying.
